SUMMARY PROFILE

Informatics Engineering graduate with professional experience in backend development, software engineering, database management, and data engineering. Skilled in Python, Java, C#/.NET, SQL, Golang, and JavaScript, with hands-on experience developing web applications, server-side logic, database schemas, and scalable technical solutions. Strong understanding of object-oriented programming, software development lifecycle, problem solving, and technical documentation. Seeking to build a long-term career as a Software Engineer.

WORK EXPERIENCES

PT. Neural Technologies Indonesia (South Jakarta)

January 2025 – July 2026

Data Engineer

- Developed and maintained scalable data pipelines using Apache Airflow, ensuring reliable data flow and timely availability for analytics, reporting, and business intelligence needs.
- Managed and optimized data operations across Google BigQuery and PostgreSQL, improving data accessibility, query efficiency, and database reliability.
- Automated recurring data processing and operational tasks using Python and Shell Script, reducing manual workload and supporting more efficient data workflows.
- Implemented robust data validation processes to enhance data accuracy, consistency, and reliability across multiple data sources.
- Integrated diverse internal and external data sources into centralized data environments, enabling cross-functional teams to access more comprehensive business insights.

CV. Garuda Infinity Kreasindo (Bandung)

June 2024 – October 2024

Backend Developer

- Developed and maintained the GIK Talent Web App, a human resource management platform designed to streamline employee data, talent mapping, and internal HR processes.
- Engineered clean, efficient, and maintainable server-side logic using C# and ASP.NET Core, improving application functionality and backend reliability.
- Designed and managed PostgreSQL database schemas, ensuring data integrity, optimized query performance, and structured data management for HR-related features.
- Integrated backend services with user-facing components by collaborating with front-end developers and senior engineers throughout the development lifecycle.
- Contributed to the full software development lifecycle, from requirement understanding and logic implementation to testing, debugging, deployment support, and system maintenance.

KEY SKILLS

- **Software Engineering:** Backend Development, Web Application Development, Object-Oriented Programming, Software Development Lifecycle, API Integration, Code Maintenance.
- **Programming Languages:** Python, Java Springboot, C#, ASP .NET Core, Golang, JavaScript, SQL.
- **Database & Data Engineering:** Google BigQuery, PostgreSQL, MySQL, Oracle, ETL.
- **Soft Skills:** Communication, Time Management, Organizational Skills, Team Collaboration, Leadership, Customer Experience Management.
- **Languages:** Indonesian (Native), English (Upper Intermediate).

EDUCATION

Bachelor of Applied Science (Informatics Engineering)
Politeknik Negeri Bandung | Bandung, Indonesia

August 2021 – August 2025
GPA: 3.63

ORGANIZATION EXPERIENCES

AIESEC in Bandung

January 2022 – January 2023

Organizing Committee Member

- Managed end-to-end operations for the AIESEC Future Leaders program, supporting curriculum delivery, participant experience, financial tracking, and logistical coordination.
- Coordinated customer experience activities by monitoring participant engagement, resolving participation barriers, and ensuring program value was delivered consistently.
- Handled financial operations, including budgeting, cash flow monitoring, and project auditing to maintain transparency and operational accountability.
- Supported coaches and facilitators by identifying technical and logistical needs, ensuring smooth program execution from preparation to completion.
- Strengthened organizational quality through accurate data tracking, structured reporting, and continuous coordination across program stakeholders.

CERTIFICATIONS

Junior Backend Developer using Java Spring Boot – ArutalaLab

July 2025

(Credential ID: [TC2025.J.SB.C.07.021](#))

- Completed 22-hour backend development certification training program using Java Spring Boot.
- Designed and developed RESTful APIs, implementing audit trails, file transfers, and exception handling.
- Implemented security features and created unit test cases using JUnit and Java OOP principles.
- Successfully developed a software backend project case study meeting all functional requirements.
